

Job Title: Project Superintendent
Location: Portland, Oregon
Company: Advanced American Construction, Inc.

Advanced American Construction has a long history of unprecedented, national award-winning success in heavy civil/ marine construction. To build on our past and continue to grow, we are looking for a talented Superintendent to manage the execution of unique and challenging projects. This role is a great opportunity for the right candidate who is flexible, collaborative, committed to finding solutions and looking for long term career growth. AAC's Superintendents serve a crucial role in overseeing the planning, coordination, and execution of project goals on the jobsite. AAC takes on exciting, one-of-a-kind projects that require creative thinking and industry innovation. We are looking for candidates who are excited to find solutions for challenging projects.

About Advanced American Construction:

Founded in 1983, Advanced American Construction, Inc. (AAC) is a full service general contractor providing heavy civil/marine/industrial/diving/engineering services to public and private clients throughout the western United States. Our team meets project objectives by providing exceptional service, extensive project experience, state-of-the-art equipment, and a commitment to safety. AAC supports its employees by providing continued education, offering professional growth opportunities and encouraging promotion from within the organization.

Visit our website www.CallAAC.com for more information about our history, our projects and our staff.

Essential Functions and Responsibilities:

The Project Superintendent is responsible for providing onsite value and assistance in project administration, scheduling and field operations for a variety of projects in heavy civil/marine construction. This role will report to the Senior Project Manager and will work closely with the project management team as well as the onsite craft foreman to plan, coordinate and manage on-site construction activities and effectively execute the goals of the project.

Specific position responsibilities:

- Ensure that the work performed safely and productively
- Supervise subcontractor activity on project jobsites
- Identify issues and challenges at the jobsite and work to develop and implement solutions promptly
- Interface with related departments including operations, engineering, drafting and administration to accomplish necessary project tasks, reporting and/or design.
- Maintain site safety and risk management processes in accordance with AAC's & the customer's safety program
- Participate in professional organizations to ensure updated knowledge of trends and practices within the construction industry

Qualifications:

- Minimum 5 years of experience in field/project engineering/management for both private and public heavy civil construction projects, preferably experience in marine construction including pile-driving, dock construction, bridge, and utility work.
- Availability to travel regionally as needed for business purposes
- Valid driver's license and reputable driving record
- Strong communication skills both verbally and in writing and a clear ability to organize and prioritize workload

To Apply: Email resume and cover letter to HR@CallAAC.com Resumes will be reviewed, and candidates identified promptly. Qualified candidates will be contacted with details for interview process. Competitive compensation and benefit package.
